Intro

Why you should listen to Dr. Lindzen

How Ivy league hirings work

Harvard or MIT?

Emphasis on racism in the sciences

Administrators outnumber faculty and students

Wasting time on a broken grant system

There is no money for questioning mainstream science

1800's science papers shock students

Scientific journals are not endorsements of the science they publish

1970's, they notice an increase in Co2

Classism and religious warping

Impoverishing ourselves for no reason

Objections to the narrative

Coriolis effect

Jordan plays devils advocate

Politicians base their policy on scientific summaries written by politicians

Bjørn Lomborg: even if they're right, it's not a big deal

Tipping points, how they actually work

Averaging anomalies

Climate threat still five thousand years away

Computer models, limitations and benefits

Fluid dynamics

Models on top of models predicting nothing

Where scientists actually agree

Money corrupts, \"Climate Scientist\" did not exist in the 90's

Speaking for your values without asking you what they are

Gatekeepers holding back the world of science

Stoking terror, stifling science

You'll falsify your own psyche if you falsify your words

Standing your ground, living toward truth
