EGR valve cleaning WITHOUT DISMANTLING - Cleaner kit test Before/After - EGR valve cleaning WITHOUT DISMANTLING - Cleaner kit test Before/After by TutoBuild Eng 8,984,124 views 9 years ago 7 minutes, 34 seconds - How to clean an EGR valve without dismantling with a Bardahl EGR valve cleaner kit. EDIT 12/02/2015: The video uses the pack ...

Test of a EGR valve cleaner kit without dismantling (Diesel engine)

The product which will be tested is a professional product for professional use

According to the manual, the engine mileage must be less than 95 000 miles

The vehicle which will be tested has exceeded this limit (113 602 miles)

Here the valve before cleaning

The valve refitting

The kit contains an EGR valve aerosol cleaner and an EGR valve diesel additive to add into the fuel tank

The aerosol must be pulverized between the air filter and the intake manifold, after the air-flow sensor

This vehicle does not have an air-flow sensor (Renault Megane 1), the spraying is performed directly after the air filter

This vehicle has an air-flow sensor (Peugeot 206 hdi), the spraying is performed after the air-flow sensor

Disconnect the air intake pipe

Spray 3 or 4 short bursts of 1 second maximum into the air intake pipe

Wait-1-minute between each spray while changing engine speed from 1000 to 3000 rev / min

Renew the operations until exhaustion of the aerosol by doing a pause all the 10 times

Pause the tenth time

Then resume operations

Engine speed between 1500 and -2000 rpm

Stop when the aerosol is empty

Refit the air intake pipe

Pour the diesel additive in 20 liters of fuel

Drive for 10 miles while regularly increasing engine speed to 3000 rpm

Removing the EGR valve to judge the effectiveness of the product (this is not done in the normal operating mode!)

Despite the too high mileage of the engine (110 000 miles); it is noted that the product managed to eliminate the main impurities

If a fault indicator is displayed on the dashboard, ask a mechanic to erase the fault code with a diagnostic tool
